SUMMARY

Software Developer and AI Engineer with hands-on experience in full-stack development, microservices, and AI-driven applications. Seeking to leverage JavaScript, Node.js, and the PERN stack to build scalable backend systems and intelligent solutions. Eager to contribute to agile development teams, work with modern databases (PostgreSQL, MongoDB), and deploy applications on cloud platforms like AWS.

EXPERIENCE

L&T Technology Services, Hyderabad | *Intern* | Project Trainee

Feb 2025 - May 2025

FullStack WebDevelopment | **ReactJS, NodeJS, ExpressJS, PGSQL**

- Worked on full-stack web development using the PERN stack, where I was responsible for developing scalable RESTful APIs with Node.js and Express. I integrated PostgreSQL for backend data management, ensuring efficient and optimized database operations. Additionally, I collaborated on frontend-backend integration, enabling seamless functionality and enhancing overall user experience.

Karunadu Technologies (Remote) | ML Intern

Sep 2024 - Dec 2024

Machine Learning | **Python, Django, ML-Models**

- Developed machine learning models for breast cancer and hepatitis prediction using SVM, KNN, and Random Forest algorithms. I also built a CNN-based handwritten digit recognition system and deployed the models using Django for web integration.

PROJECTS

GenAI - Powered Information Retrieval System | **Python, Gemini API, FAISS**

- Developed a GenAI-powered document retrieval system that processes user-uploaded PDFs, processes data using FAISS and vector embeddings, and stores them in vector store.
- Implemented a query-based retrieval mechanism using FAISS and Gemini API to generate accurate, context-aware responses, enhancing document accessibility.

Web Development | **React, Node, Express, Javascript, PGSQL** - Intern Project

- Designed and developed a full-stack e-commerce cart application using React, Express, Node.js, and PostgreSQL, supporting smooth product browsing and cart management.
- Implemented user-friendly interfaces and RESTful APIs to handle product additions, updates, and deletions with reliable backend processing and database integration.

Wine Quality Prediction Web Application | **Django, Machine Learning algorithms**

- Built an interactive web application using the Django framework and machine learning techniques to predict wine quality scores based on various input parameters. Integrated algorithms for real-time data analysis.

SKILLS

- **Technical** - ReactJS, JavaScript, NodeJS, Express, PGSL, Python, AI & ML, Django, Git, CI/CD, SQL
- **Soft Skills** - Adept communicator, Pragmatic, Team-focused, Supportive Listener
- **Languages** - English-Proficient, Telugu-native, Kannada-native, Hindi-Conversant

EDUCATION

B.E. in Artificial Intelligence & Machine Learning

CGPA - 8.72
